Chapter 9. Bibliography

1. *Manager's Guide to Forecasting.* **David M. Georgoff, Robert G. Murdick.** s.l. : Harvard Business Review, 1986, Vol. 64, pp. 110-120.

2. *Knowledge Based Management Support Systems.* **G. Doukidis, Fr. Land and G. Miller.** 1989.

3. *Production planning systems and their applicability to make-to-order companies.* **L.C. Henry and B.G. Kingsman.** s.l. : European Journal of Operational Research, 1989, Vol. 40.

4. *Design and scheduling of apparel manufacturing systems with both slow and quick production lines.* **Tang, Z.-B., Hammond, J. H., & Abernathy, F. H.** s.l. : In Proceedings of the 33rd conference on decision and control, 1994.

5. *Dye machine scheduling and roll selection.* **Saydam, C., & Cooper, W. D.** s.l. : Production and Inventory Management Journal, 1995. 36(4), 64–70.

6. *Expert system support in the textile industry: End product production planning decision. Expert Systems With Applications.* **Ford, F. N., & Rager, J.** 1995. 9(2),237–246.

7. *Production scheduling in the textile industry:A practical approach using evolutionary algorithms with domain-dependent information.* **Shiroma, P. J., & Niemeyer, G.** s.l. : In Proceedings of the 24th annual conference of the IEEE. Industrial Electronics Society, IECON'98, 1998. Vol. 1, p.269.

8. *Computer simulation of textile facilities. Systems Engineering.* **Sun, J., & Chisman, J. A.** 1991. 450-452.

9. *Scheduling flexible manufacturing systems for apparel production.* **Tomastik, R. N., Luh, P. B., & Liu, G.** s.l. : IEEE Transactions on Robotics and Automation, 1996. 12(5), 789–799..

10. *Genetic algorithms for the optimal common due date assignment and optimal scheduling policy in parallel machine earliness/tardiness scheduling problems.* **Min, L., & Cheng, W.** s.l. : Robotics and Computer-Integrated, 2006. 22, 279–287.

11. *Mathematical model and genetic optimization for the job shop scheduling problem in a mixed- and multi-product assembly environment.* **Guo, Z. X., Wong, W. K., Leung, S. Y. S., Fan, J. T., & Chan, S. F.** s.l. : A case study based on the apparel industry. Computer and Industrial Engineering, . 50, 202–219.
