Dr. G. Wijayarathna
Senior Lecturer
Department of Industrial Management
University of Kelaniya
Kelaniya

Acknowledgement

I'd like to convey my sincere gratitude to my esteemed supervisor Dr. Gamini Wijayarathna for his invaluable advices, perspective guidance and dedication without which the project wouldn't have been a success.

I'd take this opportunity to give my sincere thanks to Dr. Ajith Maddhurapperuma for all the invaluable guidance given to me throughout the course.

The support and the courage given by my batch mates were immense. My heartfelt thanks to all of them, especially to the good hearted friend Anuradha who gave quite a lot of support during the period of the project.

I would like to acknowledge all the lecturers and the non-academic staff of the IT faculty of University of Moratuwa for their commitment and attempt to complete the course on time.

The management and my colleges of both the companies, for which I worked during the MSc course, namely "DMS Software Technologies" and the "CodeGen International" should be especially acknowledged for their favorable attitude towards education and for the encouragement given to me despite the fact that there were tight deadlines.

Last but not least, I should give my heartfelt thanks to my parents for always being behind me at all the difficult times and my two sisters and my brother in law for making the mood and the environment to study and my grandparents for bidding me well wishes.

Table of Contents

<i>Chapter 1</i>	2
Introduction	2
1.1 Introduction	2
1.2 Introduction to the Company	2
1.2.1 Type of Business	2
1.2.2 Brands	2
1.3 Introduction to the Department in concern	3
1.4 Introduction to the current manual process in brief	3
1.5 Activity Diagram of the Existing System	4
1.6 Problems and weaknesses of the Manual System	5
1.7 Aim and Objectives	5
1.7.1 Aim	5
1.7.2 Objectives	5
1.8 System Requirements	6
1.9 Structure of the Dissertation	6
1.10 Summary	7
<i>Chapter 2</i>	8
Problem Domain and Motivation	8
2.1 Introduction	8
2.2 The current manual process	8
2.3 Problems and weaknesses of the current process	10
2.4 Total time spent per the End-to-End process	12
2.4 Comparison – Other solutions Vs proposed solution	14
2.5 Proposed US-LIMS system	16
2.6 Summary	17
<i>Chapter 3</i>	18
Technology Adopted	18
3.1 Introduction	18

Laboratory Information Management System

3.2 Software Process Models	19
3.2.1 Waterfall model	19
3.2.2 Evolutionary development	21
3.2.3 Component-oriented development	22
3.2.4 Process iteration	23
3.3 Software Analysis and Design Techniques	25
3.3.1 Unified Modeling Language (UML)	25
3.3.2 Structured System Analysis and Design Method (SSADM)	27
3.4 Program development Techniques	27
3.4.1 Programming languages	27
3.4.2 Web Servers and Relational Database Management Systems (RDBMS)	28
3.4.3 Interactive Development Environments	29
3.4.4 Operating System	30
3.5 Summary	30
<i>Chapter 4</i>	31
Technologies Adopted to Reach the Solution	31
4.1 Introduction	31
4.2 Chosen Process Model	31
4.2.1. Inappropriateness in other process models	32
4.3 Chosen Analysis and Design Technique	32
4.3.1 The advantages of OOD over SSADM	32
4.3.2 Chosen UML Artifacts	33
4.4 Chosen Development Environment	33
4.4.1 Interface designer /PHP editor	33
4.4.2 Graphics Editor	33
4.4.3 Web/ Application Server	33
4.4.4 Database Server	34
4.4.5 Operating System	34
4.5 Proposed Scope of the Project	34
4.5.1 Limitation of the Scope	34
4.6 Summary	34
<i>Chapter 5</i>	35
Analysis and Design	35
5.1 Introduction	35

5.2 Inception and Requirement Gathering	35
5.2.1 First Interview	35
5.2.2 Second Interview	35
5.3 Software Requirement Specification for the Proposed System	36
5.3.1 Functional Requirements	36
5.3.2 Non-Functional Requirements	38
5.4 Check List for the proposed system	39
5.5 UML Artifacts	40
5.5.1 System Level Use Case Diagram for the proposed system	40
5.5.2 Manage Test Jobs	41
5.5.3 User Case descriptor for Create Test Job	42
5.5.4 Activity diagram for Create a Test Job	43
5.5.5 Grammatical Analysis	44
5.5.6 Sequence diagram for Create Test Job	44
5.6 Class Diagram derived for the proposed system	45
5.7 Database Design	46
5.7.1 ER Diagram for the proposed system	46
5.7.2 Relationship Diagram	47
5.8 Architectural Diagram	48
5.8.1 Administrator Module	48
5.8.2 Test Job Management Module	48
5.8.3 QA Module	49
5.8.4 Workflow Management Module	49
5.8.5 Test Job Search Module	49
5.9 Discussion - System Design Decisions	49
5.9.1 Test Job concept	49
5.9.2 User Case Vs Function	49
5.10 Database Design Decision	50
5.10.1 "One to Many" Vs "Many to Many" Relationship	50
5.11 Graphical User Interface (GUI) Design	52
5.11.1 Log-in Screen Template	52
5.11.2 Post Log-in Screen Template	53
5.11.3 Data entry Screen	54
Chapter 6	55

Laboratory Information Management System

Implementation	55
6.1 Introduction	55
6.2 Three Tire Architecture	55
6.3 User Interface Layer Implementation	55
6.3.1 Inline frames (iFrames)	55
6.3.2 Use of “Bread crumb”	57
6.3.3 Use of Java Script	57
6.4 Business Logic Layer	58
6.4.1 Session Management	58
6.4.2 Business Logic Implementation	58
6.5 Database Interaction Classes	59
6.6 Program deployment Structure	61
6.7 Problems Faced	61
6.7 Summary	61
<i>Chapter 7</i>	62
Evaluation and Testing	62
7.1 Introduction	62
7.2 Software Evaluation	62
7.2.1 Usability	62
7.2.2 Understandability	62
7.2.3 Learnability	63
7.2.4 Installability	63
7.3 Software Testing	63
7.3.1 Black Box Testing	63
7.3.2 White Box Testing	63
7.3.3 Comparison – Black Box testing Vs White Box Testing	64
7.4 Black Box Testing with UML	64
7.5 Test Plan	65
7.5 1 User Log-in - Test Cases	66
7.6 Summary	67
<i>Chapter 8</i>	68

Laboratory Information Management System

Conclusion and Future work	68
8.1 Conclusion	68
8.2 Future Work	69
References	70

Appendixes

- Appendix A..... Terms and Acronyms
- Appendix B..... Feasibility study of the proposed solution
- Appendix C..... Activity Diagram of the Existing System
- Appendix D..... Analysis of current manual process
- Appendix E..... UML Artifacts
- Appendix F..... Grammatical Analysis
- Appendix G..... Sequence Diagrams for the proposed system
- Appendix H..... Class Diagram for the proposed system
- Appendix I..... Entity Relationship (ER) Diagram for the proposed system
- Appendix J Relationship Diagram for the proposed system
