July 2023

## **DECLARATION**

I declare that this is my own work and this thesis does not incorporate without acknowledgement any material previously submitted for a degree or diploma in any other University or Institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text. I retain the right to use this content in whole or part in future works (such as articles or books).

Signature:

Date: 29/07/2023

The above candidate has carried out research for the Masters thesis under my supervision. I confirm the declaration made above by the student is true and correct.

Name of the Supervisor: Dr. R.M.S. Rathnayake

Signature of the Supervisor:

Date: 29/07/2023

## **ACKNOWLEDGEMENT**

I would like to take this as an opportunity to express my sincere gratitude to all those who helped me in completing my research study on “Factors Influencing Freelance Intention of Sri Lankan IT Employees”.

First and foremost, I wish to thank the University of Moratuwa and my research supervisor Dr. Sunimal Rathnayake, Senior Lecturer of the Department of Computer Science and Engineering, University of Moratuwa, for the continuous support, encouragement, and attention extended to me throughout the research process.

Next, I wish to convey my special gratitude to the participants of my survey questionnaire for spending their precious time and for their honest responses. Furthermore, I extend my earnest thanks to the MBA batchmates for the guidance and resources provided in bringing this study to a success.

Next, I would like to thank my company and colleagues for the support they have given me to balance my professional life with academics.

Further, I would extend my special gratitude to my family and friends for being the best support system someone could have. Your help, especially throughout the data collection process, is highly appreciated.

Finally, I wish to convey my heartfelt thanks to all those who helped me in many ways in bringing this study a success.

## **Abstract**

With the COVID-19 pandemic, freelancing has become more popular in many sectors around the world due to unemployment, lack of job security, the flexibility of remote working, and increased demand from employers. The purpose of the study is to determine the drivers of the freelance intention of Sri Lankan IT employees. Convenience sampling was adopted as the sampling technique, and data was gathered from 384 IT employees engaged in freelancing via an online survey. SPSS Statistics 20 and Microsoft Power BI were used to interpret collected data, and correlation and multiple regression analysis were performed to test hypotheses. According to the results of hypothesis testing, Financial Motivation, Opportunity, and Primary Job-related Motivation have a positive and significant impact on the Freelance Intention of IT employees. These findings suggest that IT companies should focus on these factors when managing human resources. The originality of the study is the examination of the freelancing intention of Sri Lankan IT employees with the emergence of COVID-19. To create harmony between employer and employees, the author recommends prior recognition of drivers and form strategies accordingly and identify challenges in advance and mitigate potential performance issues for a win-win situation.
